It ought to be clear to every global geopolitical and geomilitary analyst that the entire planetary chessboard is blowing up in real-time. Actually, out of sheer desperation, it's

being blown up by the Western hegemons in their fierce determination to maintain their domination over the *Global Economic & Financial System*.

You name the continent or country, major city or power province, and there are “major moves and maneuvers” being made by the US-UK-IL-UA-EU-NATO Terror Group and Warmongering Gang of Bullies.

For example, the French Government just collapsed as the South Korean president illicitly declared martial law. The CIA is coordinating yet another color revolution in Georgia as the new and improved ISIS (aka Israeli Secret Intelligence Service) is attacking Syria again with direct military assistance from Turkey, as well as from British-American Military Industrial Complex (Where else does their endless supply of the latest and greatest weapons come from?!).

Of course, there is always the highly organized genocide of Christian Slavic men in Ukraine by Neo-Nazi Zelenskyy as there is the very sly proxy war against Russia being waged by the Zio-Anglo-American Axis that wants to conquer that largest nation on Earth. How else can the London banksters and their Yankee bully accomplices stave off their impending bankruptcies?

Let's face it: no one does coups and color revolutions like the *Bloody Brits* and their American henchmen. That's right, all of the planning of these violent takeovers takes place in London in very the same offices of the now defunct but very much alive British East India Company that began cobbling together their tyrannical British Empire at their founding in 1600.

What's the critical point?

Empires never die quickly or easily. And, in the case of the rapidly imploding US-UK Empire, they will fight tooth and nail — everywhere and anywhere — not to be consigned to the ash heap of history, which is exactly where they are going. For the *Almighty Dollar* has been forever dethroned regardless of their multifarious and futile countermeasures.

Just take a close look at the current status of the never-ending and absurdly daffy *Greater Israel* project. Gaza and the West Bank, Syria and Iraq, Iran and Lebanon

are all being targeted with either total destruction and/or regime change as never before so that the Zionist State of Israel will someday look like this:

However, there is much more to this crazy story than a bunch of wild-eye Zionists (who are not even Semitic) wanting take over the whole place regardless of how many nuclear world wars are necessary. Because at the end of the day, it's always about land and natural resources, strategic territories and energy, etc.

Every major Western move and maneuver on the global geopolitical chessboard today is about three things above everything else:

- (i) to prevent the de-dollarization of the global economy,
- (ii) control all oil and gas supplies throughout the Middle East,
- (iii) and maintain US hegemony worldwide.

The following insightful analysis provides a real-time understanding of the recent military moves in the Middle East, the true intentions of the Zio-Anglo-American Axis perpetrators, as well the expected outcomes and planned ramifications of those warmongering endeavors for the notorious ***Empire of Lies***.

State of the Nation

This particular article [here](#) misses the elephant in the room. What is happening in Syria is a regime change similar to what occurred in Libya, not a civil war.

The terrorists are being used by the US, UK, Israel, and Turkey, with the collaboration of others, to depose President Bashar al-Assad and replace him with an American-compliant regime.

The main goal, however, is to weaken the resistance to US and Israeli hegemony in the Middle East.

The strategy started with devastating aggression against the Palestinians, then Lebanon, and now Syria. At the same time, there were attacks on Yemen, Iraq, and Iran. This coordinated strategy is meant to weaken Iran's allies as a phase 1.

Then when these allies are sufficiently weak, a full-scale war on Iran will start. By inflicting a blow to the resistance in the MidEast, the planners also intend to weaken Russia and China's influence in the MidEast.

It's also assumed this will weaken the BRICS too and stop its expansion as well as reverse the rapid de-dollarization.

On the regional level, taking over Syria will weaken Hezbollah as the transfer of weapons and manpower from Iran to Hezbollah will be impacted. This in turn, weakens Hezbollah and causes a domino effect, resulting in the fall of Lebanon to the Zionists.

There is no legitimate opposition to Assad, at least that is significant. It's all engineered by the CIA, MI6 and Mossad, and other Western intelligence agencies that see their world order being challenged (i) in the MidEast by Iran and its allies, (ii) in Europe by Russia, and (iii) in Asia by China and North Korea.

The Americans are also engineering an alliance of Sunnis and Israel to form a NATO-like entity to protect American, Israeli, and Sunni regimes' interests in MidEast.

When the dust settles, the Americans will have total control of the energy throughout the MidEast to feed Europe, removing Russia permanently as an energy supplier.

Such an outcome will also allow the US to blackmail other energy-dependent countries such as India, China, and others. Another benefit is to save the swiftly collapsing

petrodollar.

This remaking of the MidEast will free the Americans to pivot to Asia to wage war on China using Taiwan, just like they used Ukraine to weaken Russia. This is the whole plan, its objectives, and the geopolitics of it. In a nutshell, this crisis is MUCH bigger than Syria.
